github.com/Suresh-full-stack-developer | Tirupattur, Tamil Nadu, India

## SUMMARY

B.E. Computer Science and Engineering graduate with a strong foundation in Java, Object-Oriented Programming, Data Structures, SQL, Spring Boot, REST APIs, and web development. Experienced in developing academic and personal projects using Java, Spring Boot, MySQL, HTML, CSS, and JavaScript. Seeking an entry-level Java Full Stack Developer position to contribute to software development projects while continuously improving technical skills.

## EDUCATION

**Bachelor of Engineering (B.E.) – Computer Science and Engineering** **87% (CGPA: 8.7)**
Podhigai College of Engineering and Technology, Tirupattur 2022 – 2026

## EXPERIENCE

**Java Programming Intern** | *Bosco Soft Technologies* *Internship / Industrial Training*

- Developed Java programs using Object-Oriented Programming concepts.
- Practiced core Java concepts including exception handling and collections.
- Used Eclipse and Git/GitHub for development and source-code management.

## TECHNICAL SKILLS

**Programming Languages:** Java, SQL, PL/SQL, JavaScript
**Frontend Technologies:** HTML5, CSS3, JavaScript, Bootstrap
**Backend Technologies:** Spring Boot, Spring MVC, REST API, JDBC, Hibernate/JPA
**Database:** MySQL
**Core Java:** OOP, Exception Handling, Collections, Generics, Multithreading, Java 8 Features, Stream API
**Tools:** Git, GitHub, Maven, Eclipse, Spring Tool Suite, VS Code, Postman
**Concepts:** Data Structures & Algorithms, DBMS, OOP, MVC Architecture, CRUD Operations

## PROJECTS

**Job Portal and Recruitment System** | Technologies: Java, Spring Boot, REST API, Spring Data JPA, MySQL, Postman

- Developed a RESTful backend application for managing job postings, candidate profiles, and job applications.
- Implemented CRUD operations for jobs, employers, candidates, and applications.
- Designed Controller, Service, Repository, and Entity layers using layered architecture.
- Integrated MySQL database using Spring Data JPA.
- Implemented job search and application status tracking such as applied, shortlisted, and rejected.
- Tested REST APIs using Postman.

**Foodie – Food Order Management System** | Technologies: Java, Spring Boot, REST API, Spring Data JPA, MySQL, Postman

- Developed a RESTful backend application for managing customer food orders.
- Implemented CRUD operations for creating, retrieving, updating, and deleting orders.
- Designed Controller, Service, Repository, and Entity layers using layered architecture.
- Integrated MySQL database using Spring Data JPA.
- Tested REST APIs using Postman.
- Implemented order fields such as customer name, item, amount, and order status.

## RELEVANT COURSEWORK

Object-Oriented Programming, Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Software Engineering
